- 1) Per share data was derived by using the weighted average shares of FSIC’s common stock outstanding during the applicable period. Per share numbers may not sum due to rounding.
- 2) Adjusted net investment income is a non-GAAP financial measure. Adjusted net investment income is presented for all periods as GAAP net investment income excluding (i) the accrual for the capital gains incentive fee for realized and unrealized gains; (ii) excise taxes; and (iii) certain non-recurring operating expenses that are one-time in nature and are not representative of ongoing operating expenses incurred during FSIC’s normal course of business (referred to herein as one-time expenses). FSIC uses this non-GAAP financial measure internally in analyzing financial results and believes that the use of this non-GAAP financial measure is useful to investors as an additional tool to evaluate ongoing results and trends and in comparing its financial results with other business development companies. The presentation of this additional information is not meant to be considered in isolation or as a substitute for financial results prepared in accordance with GAAP. A reconciliation of GAAP net investment income to adjusted net investment income can be found above.
- 3) The per share data for distributions reflects the amount of distributions paid on January 4, 2017 to stockholders of record as of the close of business on December 21, 2016.
- 4) See FSIC’s annual report on Form 10-K for the year ended December 31, 2016 for a description of FSIC’s investment strategies.
- 5) Gross portfolio yield represents the expected annualized yield of FSIC’s investment portfolio based on the composition of the portfolio as of the applicable date.
- 6) Interest income is recorded on an accrual basis. See FSIC’s annual report on Form 10-K for the year ended December 31, 2016 for a description of FSIC’s revenue recognition policy.
