- 2) Adjusted net investment income is a non-GAAP financial measure. Adjusted net investment income is presented for all periods as GAAP net investment income excluding (i) the accrual for the capital gains incentive fee for realized and unrealized gains; (ii) excise taxes (iii) the impact of accretion resulting from merger accounting; and (iv) certain non-recurring operating expenses that are one-time in nature and are not representative of ongoing operating expenses incurred during FSK's normal course of business. FSK uses this non-GAAP financial measure internally in analyzing financial results and believes that the use of this non-GAAP financial measure is useful to investors as an additional tool to evaluate ongoing results and trends and in comparing its financial results with other business development companies. Adjusted net realized and unrealized gain is a non-GAAP financial measure. Adjusted net realized and unrealized gain is presented for all periods as GAAP realized and unrealized gains to exclude the impact of the merger accounting. The presentation of this additional information is not meant to be considered in isolation or as a substitute for financial results prepared in accordance with GAAP. A reconciliation of GAAP net investment income to adjusted net investment income and GAAP net realized and unrealized gain to adjusted net realized and unrealized gain can be found above.
- 3) Net debt to equity ratio is debt outstanding, net of cash and foreign currency and net payable/receivable for investments purchased/sold and repaid, divided by net assets.
- 4) The per share data for distributions reflects the amount of distributions paid per share of our common stock to stockholders of record during each applicable period.
