FOR IMMEDIATE RELEASE

FS Investment Corporation Increases Public Offering Price to \$10.65 Per Share

PHILADELPHIA, January 3, 2011 – On December 31, 2010, FS Investment Corporation (“FSIC”) determined to increase its public offering price from \$10.50 to \$10.65 per share. This increase in the public offering price – which is consistent with the public guidance issued by FSIC on December 17, 2010 – was effective as of FSIC’s January 3, 2011 semi-monthly closing and first applied to subscriptions received from December 16, 2010 through December 31, 2010.

“Continued gains in our portfolio and a corresponding increase in the net asset value (“NAV”) of FSIC’s shares drove our decision to again raise the offering price,” commented Michael C. Forman, FSIC’s Chairman and Chief Executive Officer. “Although capital appreciation is not FSIC’s primary objective, the incremental increase from \$10.40 to \$10.65 per share over the past couple of months validates our operating strategy. We are pleased to have ended 2010 on a high note.”

The purpose of the increase in the public offering price is to ensure that FSIC’s NAV per share does not exceed its net offering price, as required by the Investment Company Act of 1940. FSIC’s board of directors (the “Board”) determined that FSIC’s recent strong portfolio performance and current and projected market conditions warranted taking this action.

If FSIC’s strong portfolio performance continues, FSIC’s NAV per share may again exceed FSIC’s increased net offering price. In such case, the Board may further increase the per share offering price of its common stock for its future semi-monthly closings. The Board expects that, if adjusted further, the per share offering price will be between \$10.65 and \$11.00 per share. The Board has not yet determined that a further adjustment to the newly-established offering price of \$10.65 per share will be necessary. FSIC will announce any change in its current offering price and will update this guidance should its anticipated public offering price move outside of this range.
